

MEMORANDUM

TO: FILE

FROM: WHALEN TOY
Water Resources Control Engineer
Data Management Unit - Statement Program
Division of Water Rights

DATE: May 04, 2007

SUBJECT: UNDELIVERED SUPPLEMENTAL STATEMENT OF WATER
DIVERSION AND USE (STATEMENT) S002595.

The U. S. Postal Service returned Supplemental Statement S002595 to the Division of Water Rights (Division) as *"not deliverable as addressed unable to forward."* Division staff subsequently used Parcel Quest™ and/or 411Locate™ on-line services in an attempt to identify current ownership of the diversion property, but were unsuccessful.

The water diverter is responsible for keeping the Division informed of any address or ownership changes. Because Division staff was unable to verify current ownership, S002595 has been designated as an inactive diversion, and has been coded as such in the Division's database. Unless notified by the current owner(s) or their agent, the Division will no longer issue a Supplemental Statement for S002595.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

② 1/4 OF NE1/4 SECTION 15, T34N, R01E, MDB&M.
③ NE 1/4 of Sec. 17, T34N, R1E, MD B&M.

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced or part of your regular water supply with reclaimed or polluted water. RETURN S FORM BY JULY 1, 1991. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons
☒ Acre-feet
☐ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1988				2.2	13.7	13.2	13.7	13.7	13.3	13.6	5.2	-	88.6
1989	-	-	-	-	10.1	13.2	13.7	13.7	13.2	10.1	+	-	74.0
1990				7.0	13.7	13.2	13.7	13.7	13.3	11.5	+	-	86.0

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

SEE ATTACHED.

B. Acreage of pasture, orchard, field crops and garden areas irrigated is governed by the available supply of water during the season and is therefore variable. The water requirements of the area susceptible to irrigation (20 acres, more or less) far exceeds the available water supply, so the use of water is extended to the largest possible acreage in accordance with the season's water supply. The number and type of stock is greatly influenced by the amount of pasture which, in turn, is controlled by the amount of water available. With the supply of less than one-half acre feet per day, 17 acres, more or less, are irrigated annually.
NONE

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

NONE

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.
